DETAILED ACTION

Claim Rejections - 35 USC § 112

Claim 38 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification fails to teach the instantly claimed "Method for manufacturing a vortex nozzle" and also fails to disclose a vortex nozzle adapted to provide vacuum measurements. What the specification discloses on page 14 line 3 to page 16, line 20; is a conduit in fluid communication with a vortex nozzle, the conduit <u>allowing</u> for the measurement of vacuum within the vortex nozzle.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 38 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 38 is vague and indefinite because the body of the claim, claims method steps which have nothing to do with A method of a manufacturing a vortex nozzle adapted to provide vacuum measurements. Furthermore, it is vague and indefinite as to how a vortex nozzle can provide vacuum measurements.

Application/Control Number: 10/668,123

Art Unit: 1723

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 38 is rejected under 35 U.S.C. 102(b) as being anticipated by Ashbrook who discloses a method comprising inserting a conduit (43') through an aperture in a housing (10); placing one end of the conduit in a cavity of a vortex nozzle (13); and securing a self-actuating seal (13a, 42) over the aperture. (see Fig. 1)

Claim 38 is rejected under 35 U.S.C. 102(b) as being anticipated by Geretis who discloses a method comprising inserting a conduit (21) through an aperture (22) in a housing; placing one end of the conduit in a cavity (27) of a noxzzle (i.e. vortex nozzle); and securing a self-actuating seal (23) over the aperture (22). (see Fig. 1)

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David A. Reifsnyder whose telephone number is (571) 272-1145. The examiner can normally be reached on M-F 9:00 AM to 5:30 PM.

Art Unit: 1723

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wanda M. Walker can be reached on (571) 272-1151. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
